**FIND A VACCINE:**  
[vaccines.gov](https://vaccines.gov)

## GENERAL COVID-19 VACCINE FACTS:

- Vaccines are **safe and effective**.
- Vaccinations are **free** and **no ID or proof of insurance** is needed.
- Severe side effects are **extremely rare**.
- The quickest way for life to **return to normal** is for more people to get vaccinated.
- Although vaccines were **developed quickly**, they are held to the same rigorous standards as other vaccines. **No corners were cut** when assessing their safety.
- Vaccines **reduce the likelihood** of severe illness and hospitalization.
- The vaccines **cannot give you COVID-19**.
- **Millions of people** have been vaccinated safely.
- **Tens of thousands of people** participated in the phase 3 trials for the three authorized vaccines. After being fully vaccinated, **no trial participants were hospitalized or died** from COVID-19.

## GENERAL AND VACCINE FINDER

- Some people may be nervous about the COVID-19 vaccines—this is understandable. Getting informed about COVID-19 vaccines is an important step to help us stop this pandemic.
- Researchers have been working on developing vaccines for other types of coronaviruses for years, so they did not have to start from scratch.
- Medical experts also used research and lessons learned from past outbreaks (Ebola, H1N1, Zika).
- Every vaccine must go through rigorous testing and inspection to ensure it is safe. To even become available, the vaccines had to meet the high safety standards of the Food and Drug Administration (FDA).
- America's health agencies also monitor the safety of COVID-19 vaccines by watching for adverse events (possible side effects). The country's leading expert's medical experts and researchers agree that the vaccines are safe and effective. This means that once you are fully vaccinated, you can protect yourself and your family from COVID-19.

Reduce lost days of  
work from COVID-19  
illness or from being  
a close contact.

Help protect your  
family and those  
that can't be  
vaccinated.

Move toward  
returning to normal.

Stop having yourself  
and your employees  
quarantine.
